## WORK EXPERIENCE

<b>Pipeline TD — Student Capstone Film</b> ( <a href="https://github.com/joseph-wardle/bobo-pipeline">github.com/joseph-wardle/bobo-pipeline</a> )	October 2025 — Present
<ul style="list-style-type: none"><li>• <b>Maintain and extend a film-scale, OS-agnostic USD pipeline</b> used by 40+ artists across <b>Linux</b> and Windows.</li><li>• Built an automatic proxy tool for point instanced USD assets (foliage) to <b>improve viewport performance by 70x</b>.</li><li>• Developed automated rendering tools using <b>Renderman</b> and <b>Pixar Tractor</b> on a 88-node render farm.</li><li>• Wrote a series of <b>MEL</b> scripts to correct and modify large sets of environment assets.</li><li>• Built a unified publishing tool that auto generates Houdini-ready USD assets and <b>.hipnc</b> files from any DCC.</li><li>• Developed <b>PyQT</b> tools to streamline artist workflows; integrated with <b>Flow Production Tracking System</b>.</li></ul>	

<b>Web Developer</b>	March 2025 — Present
Brigham Young University — Computer Science Department	<i>Provo, UT</i>
<ul style="list-style-type: none"><li>• Engineer and maintain department web services as <b>Django</b> applications using SWIFT development practices</li><li>• Design REST endpoints and internal admin UIs for non-technical users.</li><li>• Build <b>CI/CD pipelines</b> for test, image build, and deploy; local dev with <b>Docker Compose</b>; deploy to <b>Kubernetes</b>.</li><li>• Operate in <b>Linux</b> environments; instrument health checks and structured logging to simplify ops troubleshooting.</li></ul>	

<b>Audio Engineer</b>	September 2023 — Present
Brigham Young University	<i>Provo, UT</i>
<ul style="list-style-type: none"><li>• Live audio mixing for stadium sports, large-scale devotionals, and performances; FOH, streaming, sound-system design.</li><li>• Lead small crews and coordinate with clients—prioritize clear communication, reliability, and incident response.</li></ul>	

## PROJECTS

<b>Homelab &amp; DevOps (Linux Server Management)</b> ( <a href="http://josephwardle.com">josephwardle.com</a> )	2023 — Present
<ul style="list-style-type: none"><li>• Run <b>Fedora Server</b> services (<b>Podman/Quadlet, systemd</b>); reverse proxy + TLS via <b>Caddy/NGINX</b>.</li><li>• Configure backups/archival for services and media (Perforce, UE Zen, Website, Media Server, Password management)</li></ul>	
<b>Real-Time Ray Tracer</b> ( <a href="https://github.com/DallinClark/RealTimeRaytracer">github.com/DallinClark/RealTimeRaytracer</a> )	
March 2025 — August 2025	
<ul style="list-style-type: none"><li>• Built a real-time ray tracer using <b>Vulkan 1.3</b> hardware-accelerated ray tracing; authored pipeline/bootstrap code.</li><li>• Worked in a 3 man team, added developer utilities and profiling hooks; implemented in <b>C++20 modules</b>.</li></ul>	
<b>Film Grain Synthesis</b> ( <a href="https://github.com/joseph-wardle/film_grain">github.com/joseph-wardle/film_grain</a> )	
August 2025	
<ul style="list-style-type: none"><li>• Implemented physically motivated film-grain rendering (Newson et al., 2017) with GPU <b>compute shaders</b>.</li><li>• <b>Improved performance from the original paper by up to 90x</b> for grain-wise and <b>20x</b> for pixel-wise.</li><li>• Written in <b>Rust</b> with <b>WGPU compute shaders</b>; benchmarked on the Vulkan backend;</li></ul>	

## EDUCATION

<b>Brigham Young University</b>	<i>Provo, UT</i>
<i>Bachelor of Science, Computer Science (Animation &amp; Games Emphasis)</i>	<i>Aug 2023 — Expected May 2027</i>
<ul style="list-style-type: none"><li>• Cumulative GPA: 3.95/3.96</li><li>• Relevant Coursework: Data Structures, Multithreading, Linear Algebra, Modeling, Rigging, Shading, FX</li></ul>	

## SKILLS

<ul style="list-style-type: none"><li>• <b>Languages:</b> Python, MEL, C++20/23, Rust, Bash, Java, C#, HTML/CSS</li><li>• <b>Systems:</b> Linux, Windows, systemd/Quadlet, Kubernetes, Podman/Docker, NGINX/Caddy</li><li>• <b>CI/CD &amp; Deploy:</b> GitHub Actions, Jenkins, TeamCity, Git, Perforce</li><li>• <b>Render &amp; Pipeline:</b> USD, Pixar Tractor, Houdini, Maya, Nuke, Perforce, Flow Production Tracking System (Shotgrid)</li><li>• <b>Other Software:</b> Unreal Engine, Unity, Adobe, Jira, Confluence</li></ul>
